

Project XTC

X-Touch Companion

The Unofficial Guide to the Behringer X-Touch, Bitwig Studio and DrivenByMoss

Chapter 2 – A Tour of the Hardware

This chapter introduces the physical layout so later chapters can refer to controls naturally.

The Eight Channel Strips

Each strip contains a motor fader, V-Pot, scribble strip and SELECT, SOLO, MUTE and REC buttons.

The Master Section

The master section provides the master fader and navigation controls.

Assignment Buttons

TRACK, SEND, PAN, PLUG-IN, EQ and INSTRUMENT change the V-Pot function.

GLOBAL VIEW

The USER button in GLOBAL VIEW opens Browser Mode with DrivenByMoss.

Transport Controls

REW, FF, STOP, PLAY, RECORD and LOOP become second nature.

Reality Check

You do not need to learn every button immediately.

Before You Continue...

The next chapter introduces the mental model.
