

Project XTC

X-Touch Companion

The Unofficial Guide to the Behringer X-Touch, Bitwig Studio and DrivenByMoss

Chapter 3 – The Mental Model

Think of the X-Touch as a window into Bitwig rather than a traditional mixer.

Bitwig Is Always in Charge

The controller reflects Bitwig's state.

Selection Comes First

Ask what is currently selected before making adjustments.

Modes Change Meaning

The same controls perform different jobs in different contexts.

Always Read the Feedback

Motor faders, LED rings and scribble strips tell you what Bitwig is doing.

A Simple Workflow

SELECT → Observe → Adjust → Listen.

Reality Check

Unexpected behaviour is usually explained by the current context.

Before You Continue...

Next we'll look at Banks and Channels.
